

5.8GHz Transmitters Receivers & LCDs

Facts about Teletest's Transmitters & Receivers

Less interference. 5.8GHz is a newly allocated "licence free" frequency which has seven channels and is perfect for "video assist". Because the 2.4GHz frequency has become so cluttered with "WI-FI" and "Bluetooth" equipment, high power 2.4GHz transmitters are needed just to get a signal through. Teletest's 100mW 5.8GHz transmitter is as effective as a 500mW 2.4GHz transmitter used in today's urban environments.

SDI / HD-SDI decoding. Because Teletest's LCDs are designed for confidence monitoring, there is simply no need to transmit a digital signal as you would never notice the difference on a 7" screen.

Thus Teletest downconverts the SDI and HD-SDI signals from the cameras into PAL or NTSC with **NO DELAY** (we design our own decoding circuitry having spent two years and almost £200k in R&D). This means Teletest's products are far more affordable than other manufacturer's equipment which transmit digital signals and often suffer from video delay.

Choice. No other company in the World gives you as much choice as Teletest: **4 x Transmitters** and **4 x Receivers**. *We've even designed a receiver you can mount on competitor's LCD monitors, if you've already bought one!*

5.8GHz Transmitters

OZE3501 CVBS INPUTS - MINI TX

This video and stereo audio mini transmitter is perfect for mounting on DV cameras or for wearing on a belt using the clip provided.

Choice of Sony, Panasonic, JVC or Canon mini DV battery adapters.

OZE3501 £299

5.8GHz Receivers & LCDs

OZE3561 MINI & VERSATILE

This portable receiver can be mounted (eg velcro) on the rear of any monitor or worn on a belt using the clip provided. Providing video and stereo headphone outputs, this receiver is perfect for confidence monitoring by a director.

Choice of Sony, Panasonic, JVC or Canon mini DV battery adapters.

OZE3561 £349

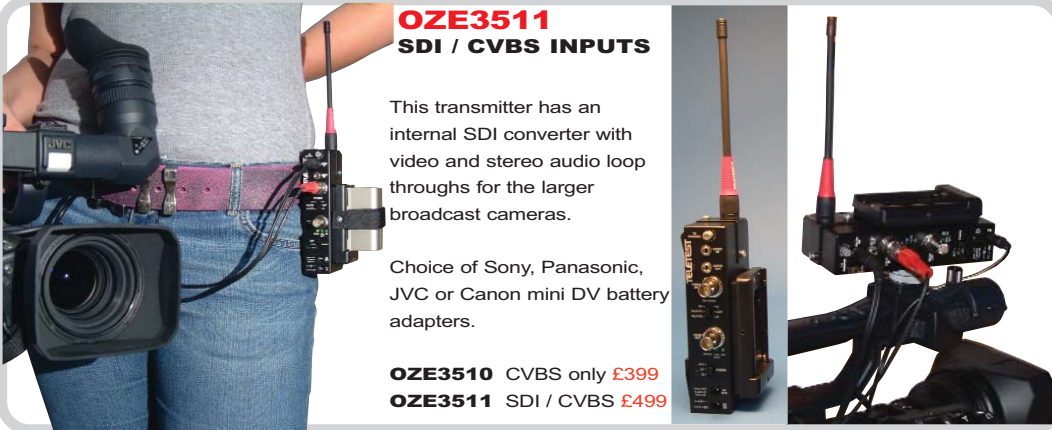

OZE3511 SDI / CVBS INPUTS

This transmitter has an internal SDI converter with video and stereo audio loop throughs for the larger broadcast cameras.

Choice of Sony, Panasonic, JVC or Canon mini DV battery adapters.

OZE3510 CVBS only £399

OZE3511 SDI / CVBS £499

OZE3571 FOR OEM V-LOCK LCDS

This video and headphone output receiver is built within two V-Lock plates. Ideal for mounting between a any LCD monitor with a V-lock plate and its battery. Comes with straight & R/A antennas for mounting in any direction.

OZE3571 £399

OZE3521 HD-SDI / SDI / CVBS INPUTS

This ground breaking transmitter has an internal HD-SDI converter and video and stereo audio loop throughs.

The built-in V-Lock plates means it can be mounted between the camera and the battery.

OZE3521 £999

OZL2458 4.5" 16/9 LCD WITH INTERNAL RECEIVER

This quality 4.5" 16/9 LCD monitor has a very high brightness screen and an internal receiver with stereo headphone outputs. Compact and portable it is perfect for those shoots where portability is essential. A range of accessories are available separately or in a money saving kit.

Choice of Sony, Panasonic, JVC or Canon mini DV battery adapters.

OZL2458 LCD only £699

OZL9458 Value for money KIT: LCD + accessories (no transmitter) £849

OZL7027 7" 16/9 LCD WITH INTERNAL RECEIVER

This large screen 7" 16/9 LCD monitor is extremely bright and it's internal receiver with stereo headphone outputs makes it perfect for use on location - satisfying the most demanding of directors! A range of accessories are available separately or in a money saving kit. Choice of Sony, Panasonic, JVC or Canon mini DV adapters or V-Lock, Anton Bauer and PAG 12V battery plates.

OZL7027 LCD only £999

OZL9727 Value for money KIT: LCD + accessories (no transmitter) £1249
